Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	**Stage 1: Identify Need**	**Stage 2: Explore Dashboard**	**Stage 3: Decide & Act**
Actions *What does the customer do?*	• Reviews EV sales and rating reports • Finds data scattered across files • Requests one consolidated dashboard	• Opens the interactive dashboards • Filters by manufacturer, category and battery type • Compares sales, price, range and ratings	• Summarises insights for leadership • Selects target segments and battery technologies • Plans product portfolio and market expansion
Touchpoint *What part of the service do they interact with?*	• Internal reports and spreadsheets • Team meetings and email • Dashboard request	• Tableau Dashboard 1 and Dashboard 2 • Filters and tooltips • Bar, scatter and stacked bar charts	• Published dashboard link or PDF export • Leadership presentation • Strategy planning sessions
Customer Thought *What is the customer thinking?*	• “Which categories and manufacturers drive our sales?” • “I need one view to compare everything.” • “Can this be answered quickly?”	• “Which battery technology dominates?” • “Where is the high-growth segment?” • “Do top-rated makers also sell the most?”	• “The data supports this decision.” • “Which segments should we invest in?” • “How do we track results over time?”
Customer Feeling *What is the customer feeling?*	Pressured and uncertain about scattered data	Curious and engaged while exploring insights	Confident and in control of the decision
Process Ownership *Who is in the lead on this?*	Market Strategy Director	Dashboard Developer (individual project owner)	Market Strategy Director with the leadership team

Opportunities *How can we improve this stage?*	• Capture KPIs and questions up front • Bring all EV data into one source • Define clear dashboard goals	• Add clear legends and tooltips • Keep filters consistent across sheets • Use extracts to improve load speed	• Add scheduled data refresh • Add growth trend views • Collect feedback to improve dashboards
